

LogoPutter, On a Roll with the Business Community...

LogoPutter was created to meet the needs of corporate America. Our design combines a high quality putter with your corporate logo. What better way to thank your best customers or gain new customers, than with a putter that performs on the course *and* sells your brand?

Our clients include **OnSite Solutions**, who work to assist car dealerships around the country and **Hangar 10**, a state of the art private aircraft hangar in Kansas City. They have a putting green inside the terminal for customers and guests to use. The putter of choice on their green is **LogoPutter**.

The milled face on the **LogoPutter** is made from aluminum for soft feel and the cushioned white grip promotes maximum comfort. All of our logos are produced by Gill Studios in Lenexa, KS. The domed vinyl decal has a permanent adhesive backing and is UV resistant. The design works nicely with our non-glare white matte finish.

Golf is a great way to do business and nothing can say thank you better than a personalized putter and head cover from **LogoPutter**.
